

Speaker 1:

I live in Mechanicsville, Virginia. My oldest daughter recently got her driver's license and I was in the car with her practicing driving. When we approached an intersection, a car went through a light and crossed in front of us and caused a collision and resulted in some injuries. I was researching personal injury cases online just to see if I would have a good case. And on one of the websites, I entered my information and Mr. Naylor reached out to me and set up an appointment. He explained the process very thoroughly and he showed interest and made me just feel that he would put forth his best effort to get the settlement that I deserved. What Mr. Naylor explained to me that I'd have to get all of my treatment and physical therapy and just make sure that I was totally healed before we put everything together to present the insurance company.

The insurance company came back with a settlement offer that was much lower than what was fair. And we decided that we would proceed with filing a court case. He negotiated somehow with the insurance company, I guess, and let them know that we were moving forward with the case. And they came back and gave us what we wanted. Overall, I'm pleased with the outcome. I think Blank & Marcus is perfect for anyone who wants to receive proper, not only justice, but just financial settlement for their personal injury claims. I have no regrets using Blank & Marcus Law Firm.
